GitHub — LinkedIn — Portfolio

Summary

First-year Computer Science (IoT) student and Hackathon Winner focused on Agri-Tech and Smart City solutions. Skilled in full-stack development and IoT automation systems. Preparing for GSOC and open-source contributions.

Skills

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, Firebase

IoT: Sensors, Real-time Monitoring

Languages: JavaScript, Python, C, R

Tools: Git, VS Code, Postman

AI: ChatGPT API

Projects

Mushroom AI Barista

- IoT-based automation system for mushroom farming
- Real-time dashboard + environmental control

Eco Guardian

- AI-based waste management system
- Tracking, classification, and dashboard features

Experience

Web Development Intern

- Built responsive apps and integrated APIs

IoT Intern

- Developed monitoring systems using sensors

Coding Instructor

- Taught web development and mentored students

Startup

Founder of IoT-based mushroom automation startup (in progress)

Achievements

Hackathon Winner — 3 Internships — Teaching Experience — Startup Builder

Education

B.E. Computer Science (IoT)

Sethu Institute of Technology (First Year)

Interests

IoT & Smart Automation — AI Integration — Open Source (GSOC) — Agri-Tech Innovation — Problem Solving
